Ogni prodotto è unico e inimitabile
una vera e propria opera d'arte.

Each product is unique and inimitable
a real work of art.

*Il **marmo** e la **pietra** sono prodotti naturali ed in quanto tali possono presentare sensibili variazioni di colore, venatura, tonalità, intrusioni di materiale e stuccature. Ciò è da considerarsi un pregio poiché conferisce valore aggiunto al prodotto finale rendendolo unico ed esclusivo.*

***Marble** and **stone** are natural products and as such may be subject to significant variations in color, texture, shades, mineral intrusion, pores and grouting. This is to be considered as an asset because it adds value to the final product, making it unique and exclusive.*

Tradizione e competitività si sposano in Marmi Serafini grazie ad un innovativo uso di tecnologie avanzate, quali macchinari a lavorazione su più assi e taglio in curva.

L'aggiornamento tecnologico permette non solo di realizzare prodotti dalle forme sorprendenti, finora impensabili, ma anche di assistere il cliente privato e il professionista con software gestionali e progettuali aggiornati e d'avanguardia, nonché di lavorare nel pieno rispetto delle norme etiche e legali di tutela ambientale.

Marmi Serafini è il partner ideale in quanto combina la flessibilità della piccola azienda all'esperienza decennale necessaria per offrire un servizio completo e personalizzabile. Il cliente viene guidato e consigliato nella scelta dei materiali, delle lavorazioni e su richiesta può essere assistito in ogni fase progettuale, dalla misurazione e rilievo, alla progettazione, fino alla posa, alla manutenzione o al restauro.

Marmi Serafini brings together tradition and competitiveness thanks to the innovative use of advanced technology, including machines for multi-axis cutting and curved cutting.

The company uses advanced technology not only to make products having extraordinary and previously unthinkable shapes, but also to assist private and professional customers with latest-generation management and design software and to fully conform to ethical and environmental standards.

Marmi Serafini is an ideal partner since it offers the flexibility of a small company combined with the decades of experience required to provide complete, personalised service.

Customers are guided and advised in the selection of appropriate materials and production methods.

Upon request, the company can assist with every step of the project, from measuring and creating renderings to designing, installing, maintaining and restoring products.

Tutto ebbe inizio così:
da un blocco di marmo
esperienza e duro lavoro,
ma è la passione che
rende unico ogni mestiere.

*It all began this way:
from a block of marble,
experience and hard work,
but it is the passion
that makes a difference.*

Da più di due generazioni lavoriamo
per un design tutto italiano

we work to create an Italian design

Material details

Marble, stone, onyx and travertine properties: all materials are natural and are therefore subject to variations in colour, veining, shades, mineral intrusions, pores and grouting. The stone used for an order may differ in look from any sample previously given to customer. It is common to find variation between and within slabs of stone from the same block or quarry. Marmi Serafini will always use matching slabs for any adjacent pieces of work in order to ensure consistency as far as possible; however, an exact match cannot always be guaranteed due to variations between and within slabs that are used.
