LUXURY ITALIAN SHOWER ENCLOSURES (PART I) - MADE IN ITALY

GLISS Sliding Shower Enclosure With Floating Sliders

Gliss is the collection of shower enclosures with a new and original technology for sliding doors. The stylistic choice of a minimal frame is combined with the innovative technical solution of the sliding parts: the movements are driven by special floating sliders: the innovative material of which are made ensures perfect sliding performances, thanks to its self-cleaning and self-lubricating properties, tested in years of experience in extremely aggressive workplaces. An easy system, but smart and hi-tech, just as a simple idea can be.

FLARE The New Pivot Door Shower Enclosure

Making innovations on a hinged door shower enclosure is a major challenge. The simplicity of movement, the immediate intuitiveness of its function and aesthetic neat lines are enhanced. We have succeeded with Vismaravetro and achieved all our objectives with Flare, including the usual and indispensable attention to water tightness, performance, user safety and ease of installation. This is an evolution inspired by tradition which develops into a new state of the art expression.

SLIDE Maximum Transparency

Slide is the new programme of shower enclosure with sliding door, studied to fit several solutions in the bathroom. Slide is characterized by the pure and essential design, by its lightness and its tested reliability. The tempered 8 mm glass and the new aluminium profiles offer an exceptional waterproof capability combined with the functionality of the sliding door. The frame type and the glass height of 195 cm point out the innovation of this new project.

LUXURY ITALIAN SHOWER ENCLOSURES (PART II) - MADE IN ITALY

SK-IN The Bespoke "Walk-in" Shower Enclosure

Sk-in is a complete program of walk-in shower solutions, consisting of fixed glass elements and no doors. The glass panels, the profiles and the hardening rods fit together thanks to a system which as usual combines design, safety, ease of mounting and water-proof.

LINEA Function And Simplicity

Equipped with a pivot door, Linea is an extremely versatile design. Thanks to small profiles and a minimal design, Linea can be used in countless combinations: niches, corners, walls, with single or double doors and with fixed panels in line with or above low partition walls. It is a truly flexible design that can adapt to any space.

TWIN The Handy Space

The first and unique shower enclosure collection that offers further opportunities to use at best the bathroom space, in line with new functional and practical needs connected with available space. Next to the shower enclosure, an authentic container to use for storing things or setting up appliances. It's also the perfect aesthetic solution.

LUXURY ITALIAN SHOWER ENCLOSURES (PART III) - MADE IN ITALY

REPLAY “Fold-Away” Space

Replay is a program of shower cabins that features a door that usually folds inwards, but can open outwards if necessary. Replay can be used to create shower cabins in corners or in niches, both small and large.

SINTESI A Customised System

Sintesi is a programme responding to the current market trend with extraordinary results: combining the aesthetic advantage of a frameless solution with mounting easiness and simplicity, thanks to the innovative fitting system.

JUNIOR Essentiality As A Project

Junior Collection is the evolution of the shower enclosure through a new focus on the essential components: a hinged door, a folding door and a fixed side. A rigorous linear form, the extreme functionality of each detail, simple installation and exceptional performance are the main reference values of the Junior Collection: essentiality as a project.

LUXURY ITALIAN SHOWER ENCLOSURES (PART IV) - MADE IN ITALY

SERIE 8000

The Sliding Shower Enclosure, Synthesis Of Experience

A notable product, but perfect for everyday use, thanks to its exceptional water-proof performance and functionality, as a result of our long experience in manufacturing sliding shower enclosures. It combines the main features of the Slide collection, a milestone of high range sliding shower enclosures, with a lightened design and at an attractive price.

SERIE 6000

Practical And Aesthetic Aspects

6000 Series is a shower enclosure system that rediscovers the simplicity and functionality of sliding doors. Suitable for a wide range of sizes, it can be used in niche, corner or wall designs. The adjustment system for the uprights and doors, which can be removed for cleaning, and new technology for rollers mounted free of internal obstructions, enables maximum ease of assembly and guarantees optimal and long-lasting performance.

SISTEMI PER VASCHE

Bathscreens

Vismaravetro, with the care it usually takes in producing a bathroom area, has designed a range of bath screens in tempered glass of different sizes, which are intended to enhance the concept of the use of the bathtub.
